

FM-2000 DIGITAL SPECTRAL PROCESSOR

WHAT IF you want the competitive edge our flagship AP-2000 31-band audio processor can give you, but don't need separate HD?

THE VORSIS FM-2000 includes ALL the features and advanced technology of the AP-2000 *except* the second HD processing chain and its dedicated output. This product is targeted for customers who need the best FM signal processing for their marketplace, but don't require separate HD processing.
